So total CFP is = 21

IFPUG calculation :

BFC type :

-External Input:

- * add New Customer
- * change interface
- * Search for media
- * Chat writing
- * Skype extension press
- * Backup Data
- * Add admin

-External inquiry:

- Verify the customer data

-Internal Logical file:

- Customer data file

-External Interface file:

- None

-External Outputs:

- Display Warning message
- Display Media

BFC Types	#FTR	#RET	#Field	#DET	#Complexity	Score
1.Add new customer	1	-	Name,address,job ,picture,Mobile number,email, Password,Enter	9	L	3
2.Use Login	1	-	Email,password,Enter	3	L	3
3.Search for media	1	-	Name of the machine or limestone,Enter	2	L	3
4.Display Warning message of not registered member	1	-	-	4	L	4
5.Payment	1	-	Electronic money card number and pin ,Enter	3	L	3
6.Chat	1	-	Open chat box,write,Enter	3	L	3
7.Change Interface	1	-	Clicking one button	1	L	3
8.Data backup	1	-	Clicking one button to backup all customer data	1	L	3
9.Customer File verification	-	1		12	L	7
10.Add Admin	1	-	Add email,password of that admin and Enter	3	L	3

Total IFPUG =

$$= 3+3+3+4+3+3+3+3+7+3=35$$
